

NISSAN PATROL FLYWHEEL REPLACEMENT

Nissan Patrol GU Y61 3.0L ZD30DDTi

During production this vehicle has been equipped with either an Exedy or LUK Dual Mass Flywheel which have different design features.

The Exedy DMF is fitted with the ring gear attached to the body of the flywheel (1 piece) whereas the LuK DMF flywheel locates over the separate ring gear assembly (2 piece).

EXEDY DMF Build Dates: 04/2000 -> 08/2004

LuK DMF Build Dates: 08/2004 ->

LUK replacement or SMF conversion
Flywheel to crank bolt with an overall
length of 76mm

Applicable to kit numbers:

PDK 42973DF

PDK 42972SF

EXEDY replacement or SMF conversion
Flywheel to crank bolt with an overall
length of 70mm

Applicable to kit numbers:

PDK 42696SF

PDK 42696DF

Failure to reinstall the appropriate Single Mass or Dual Mass flywheel may result in significant damage to the gearbox, clutch assembly, flywheel and/or crank bolts.
